eFT for z/OS (eFT213) Release 5.4.7 is a security/maintenance release that incorporates all of the features previously announced. It is available for download, and is available as a no-charge upgrade to eFT213 customers of record. This release supports installation and operation on S/390 systems that are running z/OS.

Release 5.4.7 is a security/maintenance upgrade and requires a new license key if upgrading a release prior to Release 5.4.4.

FEATURES/ENHANCEMENTS ADDED WITH eFT213 RELEASE 5.4.7

- Encrypt alias added
- Tickets listed in the MTU

OPERATIONAL/PROCEDURAL IMPACT

All eFT dataset high level qualifiers (HLQ) must be the same.

All eFT dataset low level names MUST remain unchanged. I.e., .text, .load, .loado, .clist, .msgs, .panels, and .skels.

If the HLQ is changed, the recommended procedure is to rerun the install with the new HLQ.

If this cannot be done, and the datasets are renamed, then all clists, all panels, all JCL for the server, all JCL for the client in batch, any JCL for TSO client MUST be modified.

eFT213 Release 5.4.7 requires a software key to make it operational. If upgrading from a release older than eFT213 release 5.4.4, a new software key will be required and must be obtained from support@netex.com. For new installations, a new license is required, and a software key must be obtained from support@netex.com. Refer to the Prerequisites listed in the eFT213 Release 5.4.7 Memo-to-Users for instructions on obtaining a software key.

DOCUMENTATION UPDATES

There are documentation updates for eFT Release 5.4.7. Updated product documentation:

Memo-to-Users:
