Secure eFT for z/OS (eFT213) Release 5.5 is a feature release that incorporates all of the features of eFT213 5.4.7 with the added benefit of optional private/secure transfers. It is available for download. This release supports installation and operation on S/390 systems that are running z/OS.

This product requires a new license key if secure transfers are required.

FEATURES/ENHANCEMENTS ADDED WITH eFT213 RELEASE 5.5

- Optional private and secure transfers.

OPERATIONAL/PROCEDURAL IMPACT

If encryption is selected, the connections are NOT interoperable with eFT products without encryption, however if no encryption is selected the connections are interoperable with other eFT products (IP only). Secure transfers are only supported on IP only eFT installations.

eFT213 Release 5.5 requires a new software key to enable the secure feature. For new installations, a new license is required, and a software key must be obtained from support@netex.com. Refer to the Prerequisites listed in the eFT213 Release 5.5 Memo-to-Users for instructions on obtaining a software key.
