

December 7, 2009

eFT for Solaris (eFT693) Release 5.2 is a feature release, and is available on Network Executive Software's FTP site, as well as on CD media. This release is available as a no-charge upgrade to eFT693 and H693 (USER-Access) customers of record.

This release supports installation and operation on SUN Sparc systems that are running SunOS Release 5.8 (Solaris 8), Release 5.9 (Solaris 9), or Release 5.10 (Solaris 10). This release can also be run in a branded domain environment.

FEATURES/ENHANCEMENTS ADDED WITH eFT693 RELEASE 5.2

- Limit TCP port usage to a defined range of ephemeral ports.
- ROOTDIR and HOMEDIR are included in the output from the 'show local' command.
- Display the service port in log messages.
- Updated client help.
- Miscellaneous usage fixes have been incorporated.

Refer to the eFT693 Memo-to-Users for more information on features and fixes.

OPERATIONAL/PROCEDURAL IMPACT

eFT693 Release 5.2 requires a software key to make it operational. If upgrading from a previous eFT693 release, the same software key will continue to work. For new installations, a new license is required, and a software key must be obtained from Netex Software. Refer to the Prerequisites listed in the eFT693 Release 5.2 Memo-to-Users for instructions on obtaining a software key.

This release no longer supports NetEx/IP as a transport protocol. TCP/IP is the only transport protocol that is supported. If you require support for NetEx/IP, please notify support@netex.com.

DOCUMENTATION UPDATES

Updated product documentation:

* eFT693 NetEx/eFT for SUN Solaris Systems Release 5.2 Memo-to-Users

Product Reference Manual:

* eFTxx3 NetEx/eFT for Unix Systems Release 5 Software Reference Manual
