January 15, 2023

eFT for Linux (eFT803IP) Release 5.5 is a new feature release and is available for download by contacting support@netex.com.

This release supports installation and operation on Intel x86 platforms that are running the support releases of Linux OS distributions. Refer to the support page on https://www.netex.com to view supported OS distributions.

FEATURES/ENHANCEMENTS ADDED WITH eFT803IP RELEASE 5.5

- Optionally enable secure transfers.

Refer to the eFT803IP Memo-to-Users for more information on features and fixes.

OPERATIONAL/PROCEDURAL IMPACT

eFT803IP Release 5.5 requires a software key to make it operational. The software key must be obtained from Netex Software. Refer to the Prerequisites listed in the eFT803IP Release 5.5 Memo-to-Users for instructions on obtaining a software key. If secure connections are required, a software key to enable that feature is required.

TCP/IP is the only transport protocol that is supported. SSL support is required on the OS if secure connections are required. If you require support for NetEx/IP, please notify support@netex.com.

DOCUMENTATION UPDATES

Updated product documentation:
 * eFT803IP eFT for Intel x86/Linux Systems Release 5.5 Memo-to-Users
