May 1, 2015

NetEx/IP for z/OS (H210IPZ and TNP210) Release 7.4 is a feature and maintenance release upgrade, and is available for download. This release is available as a no-charge upgrade to current H210IPZ customers of record for the OSA connectivity to NetEx/IP networks.

At the time of this announcement, H210IPZ Release 7.4 supports installation and operation on IBM z Systems that are running any supported level of z/OS up to z/OS V2R1. Check for support of future operating system levels at [www.netex.com](http://www.netex.com) by clicking on the 'Support' tab, then selecting 'IBM z Systems/zOS (H21x)' under 'Products', then viewing the 'IBM z Systems/zOS (H21x)' product section.

#### FEATURES/ENHANCEMENTS ADDED WITH H210IPZ RELEASE 7.4

The following features have been added with H210IPZ Release 7.4:

- Ability to run NetEx/IP in a reusable address space
- COBOL NetEx user interface (API)

#### OPERATIONAL/PROCEDURAL IMPACT

If upgrading from a release older than Release 7.1, or if new features are being licensed, a new software key is required. Previous keys used with H210IP Release 6.1 or H210IPZ Release 7.0 will not work with this release.

The software key was expanded in Release 7.1 to include additional information. It now contains information that identifies the LPAR name in addition to the system serial/model number on which H210IPZ is licensed. It also contains information on what features are supported. If TNP is licensed, the key also contains information regarding the number of concurrent TNP NetEx/IP sessions that are supported. The key contains an expiration date, after which time NetEx/IP will become non-operational. A new key must be obtained and installed prior to the expiration of the current key.

#### DOCUMENTATION UPDATES

- \* H210IPZ NetEx/IP for IBM z/OS Operating Systems
  - Memo-to-Users
  - Installation Reference Manual
  - Operator Reference Manual

Messages and Abend Codes Reference Manual  
Programming Reference Manual

Check for new versions of documentation at [www.netex.com](http://www.netex.com) by clicking on the 'Support' tab, then selecting your hardware platform under 'Products', then clicking on 'Docs' in the entry for this product release. The following documents are available for download:

MTU:                   Release Announcement  
                          Memo-to-Users

Software Manuals:   Installation Reference Manual  
                          Operator Reference Manual  
                          Messages and Abend Codes Reference Manual  
                          Programming Reference Manual  
                          Configuration Manager and Alternate Path Retry (APR) User Guide

#### RECENT UPDATES

Check for product updates at [www.netex.com](http://www.netex.com) by clicking on the 'Support' tab, then selecting your hardware platform under 'Products', then clicking on 'Updates' in the entry for this product release. If any updates are listed, follow the installation recommendations.

#### DOWNLOAD PROCEDURE

Customers of record may download H210IPZ Release 7.4 from Network Executive Software's download server. Download instructions can be obtained by contacting [support@netex.com](mailto:support@netex.com). Be sure to identify your company name in the request, the product being requested (H210IPZ), and contact information, including a name and telephone number.

#### END OF SUPPORT

In accordance with our policies, end-of-support for H210IPZ 7.2 and H210IPZ 7.3 will be November 1, 2015
