Secure NetEx/IP for z/OS (H214) Release 1.5.1 is a maintenance release and is available for download.

At the time of this announcement, H214 Release 1.5.1 supports installation and operation on zSeries systems that are running any supported level of z/OS up to z/OS 2.3. Check for support of future operating system levels at www.netex.com by clicking on the 'Support' tab, then selecting 'IBM S390/zSeries' under 'Products', then viewing the 'IBM S390/zSeries' product section.

FEATURES/ENHANCEMENTS ADDED WITH H214 RELEASE 1.5.1

This product is functionally equivalent to the non-secure H210IPz product but is NOT compatible or interoperable. Most notable with this product line is the ability to do secure transfers.

Refer to the Update Summary in the H214 Release 1.5.1 Memo to Users for details of the updates.

Release 1.5.1 introduces a new message to show the initialization is complete.

OPERATIONAL/PROCEDURAL IMPACT

H214 1.5.1 has been built with an updated library (legsk). For customers using Secure BFX (H215) or your own application, you will need to relink with this library. For customers using the Migration Tool (MIGZOS), the library will need to be copied from the H214 installed path to the MIGZOS tool path. Refer to "Considerations For Applications Using H214" in the H214 Installation section of the Software Reference Manual.

Refer to the Software Reference Manual for operational processes. This version will only interoperate with versions of Secure NetEx/IP.

DOCUMENTATION UPDATES

New H214 Release 1.5.1 documents:

- * H214 Secure NetEx/IP for IBM z/OS Operating Systems Memo-to-Users (1.5.1)
- * Hxx4 Secure NetEx/IP Reference Manual (man-ref-hxx4-1.5.1)

Check for new versions of documentation at www.netex.com by clicking on the ‘Support’ tab, then selecting your hardware platform under ‘Products’, then clicking on ‘Docs’ in the entry for this product release.

RECENT UPDATES

Check for product updates at www.netex.com by clicking on the ‘Support’ tab, then selecting your hardware platform under ‘Products’, then clicking on ‘Updates’ in the entry for this product release. If any updates are listed, follow the installation recommendations.

DOWNLOAD PROCEDURE

Customers of record may download H214 Release 1.5.1 from Network Executive Software’s download server. Download instructions can be obtained by contacting support@netex.com. Be sure to identify your company name in the request, the product being requested (H214), and contact information, including a name and telephone number.

END OF SUPPORT

In accordance with our policies, end-of-support for earlier releases will be May 9, 2021.
