

**H212R Print File Transfer (PFX-R™)
Receiver Utility
for IBM z/OS Operating Systems**

Release 1.4

Memo to Users

June 20, 2018

© 2002-2018 Network Executive Software, Inc.
6450 Wedgwood Road N #103
Maple Grove, MN 55311

Introduction

This Memo to Users contains information for H212R, and should be reviewed before beginning the installation process.

PFX-R for z/OS (H212R) Release 1.4 is compatible and interoperable with all other PFX-T products on other platforms.

H212R is available by download. It is no longer packaged for SMP/E installation.

The following manuals are available for H212R:

H212R Print File Transfer (PFX-R) for IBM z/OS Operating Systems Software Reference Manual

H210IPZ NetEx/IP for IBM z/OS Operating Systems Operator Reference Manual

H210IPZ NetEx/IP for IBM z/OS Operating Systems Programming Reference Manual

H210IPZ NetEx/IP for IBM z/OS Operating Systems Messages and Abend Codes Reference Manual

“C” Configuration Manager and NetEx Alternate Path Retry (APR) Software Reference Manual

The manual, along with this Memo to Users can be downloaded from www.netex.com by selecting the ‘Support’ tab, then navigating to ‘Products’, then selecting the ‘IBM z System zOS (H21x)’ link on the right side of the window, and then clicking on ‘Docs’ in the ‘PFX-R [H212R]’ entry for the appropriate version.

Support

For NetEx/IP and associated products, support is available via:

- 24x7 telephone at (800) 854-0359
- <http://www.netex.com/support>
- email: support@netex.com

Notice to the Customer

Comments about this documentation may be submitted via e-mail to support@netex.com or by visiting our website, <http://www.netex.com>. Always include the complete title of the document with your comments.

Information on Network Executive Software’s general software support policy (e.g., alternate contact methods, support severity level descriptions, and service status definitions) may be found at <http://www.netex.com/support/software-support-policy>.

Software Modification Policy

Modifications to H212R that are not specifically authorized by NESi are prohibited.

Any unauthorized modifications to H212R may affect its operation and/or obstruct NESi's ability to diagnose problems and provide corrections. Any work resulting from unauthorized modifications shall be paid by the customer at NESi's then-current support rates and may result in the immediate termination of warranty/support coverage.

New Features

Installation Procedure Changes

H212R Release 1.4 does not use SMP/E for installation. Instead, it is distributed as a downloadable package that includes a scripted batch job and sets of distribution libraries, all packaged together in TSO TRANSMIT format.

Upgrade Options

H212R Release 1.4 is available as a no-charge upgrade to existing H212R licensed customers. H212R is licensed on a per-LPAR basis.

Release 1.4

Refer to the Update Summary section on page 6 for a review of maintenance updates contained in this release.

Installation Procedure Changes

H212R Release 1.4 does not use SMP/E for installation. Instead, it is distributed as a downloadable package that includes a scripted batch job and sets of distribution libraries, all packaged together in TSO TRANSMIT format.

Release Level Display

PFX-R now displays the release level when started. For example:

```
BFX005I PFX V1.4.0 Copyright 2018 Network Executive Software
```

Release 1.3

Refer to the Update Summary section on page 6 for a review of maintenance updates contained in this release.

Installation

Installation Notes

1. H212R is available as a downloadable distribution. Download instructions can be obtained by contacting support@netex.com.
2. H212R Release 1.4 is not distributed in SMP/E format. Instead, it is distributed as a downloadable package that includes a scripted batch job and sets of distribution libraries, all packaged together in TSO TRANSMIT format.
3. Follow the installation instructions in the *H212R Print File Transfer (PFX-R) for IBM z/OS Operating Systems Software Reference Manual* to complete the installation.
4. Check if there are any H212R updates by going to www.netex.com, then clicking on the 'Support' tab, then navigating to 'Products', then selecting the 'IBM System z/OS (H21x)' link on the left side of the window, and then clicking on 'Updates' in the 'PFX-R [H212R]' entry for the appropriate version. If there are any, download them and follow their installation instructions.
