MTU-H301e-R1.3.4.4

Introduction

This memo provides supplementary and release-dependent information to users, and documents any changes to the Software Reference Manual before a new revision is published.

It should be reviewed carefully prior to installation of the product.

This release of H301e is a compatible product to the current releases of H301/H301L.

Service Notes

New Features and Issues Resolved in This Release

This release is a maintenance release for H301e

This release is a product replacement for H301/H301L, and is functionally equivalent and compatible. This product requires H300e and will not interoperate with H300IPC. At this time, H301e will interoperate with H301/H301L to provide a migration path for all customers of record.

For updates, refer to the Update Summary for details.

Update Summary
