NetEx/IP for Solaris (H690IP) Release 7.0.2-1 is a maintenance release, and is available for download. This release is available as a no-charge upgrade to H690IP customers of record. If you are upgrading from a version older than 7.0.2 you will require a new software key.

This release supports installation and operation on Sun SPARC 32-bit and 64-bit systems that are running Solaris 8, 9, 10 or 11.

Please note that this release only supports IP networks.

FEATURES/ENHANCEMENTS ADDED WITH H690IP RELEASE 7.0.2-1

Refer to the Update Summary in the H690IP Release 7.0.2 Memo-to-Users for a description of new features and updates.

Release 7.0.2-1 is the inclusion of a library function which isn't available on standard Solaris distributions for ntxoper, ntxeat and ntxgen programs. The 7.0.2 package would require that the optional library (libgcc_s.so.1) be installed on the system.

OPERATIONAL/PROCEDURAL IMPACT

H690IP Release 7.0.2-1 requires a software key to make it operational. If upgrading from a previous H690IP release, a new software key will be required for operation must be obtained from Netex Software. Refer to the Prerequisites listed in the H690IP Release 7.0.2 Memo-to-Users for instructions on obtaining a software key.
