# H820IP NetEx/IP™

## for Linux on IBM® System z®

**Release 7.0.1**

**Memo to Users**

June 4, 2013

# Introduction

The H820IP product implements the host based NetEx/IP product for Linux on IBM System z. As of this release, it has been tested on Red Hat® Enterprise Linux® 6.4 for IBM® System z®. This is an ongoing process. Please contact NESi Support for an updated list of tested systems.

For NetEx/IP and associated products, support is available via:

- 24x7 telephone at (800) 854-0359

- the worldwide web: `http://www.netex.com/`

- email: `support@netex.com`

## Product Documentation

Additional information about this NetEx/IP software may be found in the following:

- *NetEx/IP for Unix Systems Release 7.0.1 Software Reference Manual*

- *"C" Configuration Manager and NetEx® Alternate Path Retry (APR)*

The latest revision of this "Memo To Users" document and any other relevant reference documentation can be found at http://www.netex.com by going to the Support dropdown and selecting Products and then selecting the appropriate platform.

## Notice to the Customer

Comments about this documentation may be submitted via e-mail to support@netex.com or by visiting our website, http://www.netex.com. Always include the complete title of the document with your comments.

Information on Network Executive Software's general software support policy (e.g., alternate contact methods, support severity level descriptions, and service status definitions) may be found at http://www.netex.com/support.

### Software Modification Policy

Modifications to H820IP that are not specifically authorized by NESi are prohibited.

Any unauthorized modifications to H820IP may affect its operation and/or obstruct NESi's ability to diagnose problems and provide corrections. Any work resulting from unauthorized modifications shall be paid by the customer at NESi's then-current support rates and may result in the immediate termination of warranty/support coverage.
