H821 Bulk File Transfer (BFX™)

for Linux® on IBM® System z®

Release 3.4.1

Memo To Users

June 2013

Introduction

This product implements the Network Executive Software ("NESi") H821 Bulk File Transfer (BFX™) utility for Linux distributions on IBM System z. As of this date, it has been tested on Red Hat® Enterprise Linux® 6.4 for IBM® System z®. This is an ongoing process. Please contact NESi Support for an updated list of tested systems.

This document should be reviewed carefully prior to installation of H821.

For NetEx/IP and associated products, support is available via:

- 24x7 telephone at (800) 854-0359

- http://www.netex.com/support

- email: support@netex.com

Product Documentation

Additional information about this BFX software may be found in the following:

- *BFX for Unix Systems Release 3.4 Software Reference Manual*

The latest revision of this "Memo To Users" document and any other relevant reference documentation can be found at http://www.netex.com by going to the Support dropdown and selecting Products and then selecting the appropriate platform.

Notice to the Customer

Comments about this documentation may be submitted via e-mail to support@netex.com or by visiting our website, http://www.netex.com. Always include the complete title of the document with your comments.

Information on Network Executive Software's general software support policy (e.g., alternate contact methods, support severity level descriptions, and service status definitions) may be found at http://www.netex.com/support.

Software Modification Policy

Modifications to H821 that are not specifically authorized by NESi are prohibited.

Any unauthorized modifications to H821 may affect its operation and/or obstruct NESi's ability to diagnose problems and provide corrections. Any work resulting from unauthorized modifications shall be paid by the customer at NESi's then-current support rates and may result in the immediate termination of warranty/support coverage.

Service Notes

- See the Installation section in the *BFX for Unix Systems Release 3.4 Software Reference Manual* for prerequisites.

- Shell scripts named 'bfxsend' and 'bfxrecv' have been provided in `/usr/share/nesi/bfx/bin` as a BFX wildcard send/receive model. Ideally you can type 'bfxsend' or 'bfxrecv', answer the prompts, and transfer the given files to or from a remote host. Some sample remote hosts you might interact with are included in the scripts. Review the scripts and make your own site modifications.

New Features

Since this is an initial product release there are no new features.

Previous Release

None.

Installation Notes

For installation procedures for H821 please refer to the appropriate appendix in the general *BFX for Unix Systems Release 3.4 Software Reference Manual.*

Update Summary

Since this is a new release there are no updates.
